Andy Richards

PC Resolve

14th November 2012

Testimonial to PC Resolve

A couple of weeks ago I was in a bit of a panic, my laptop had completely seized up on me there was a message saying I needed to pay £100 to unfreeze it. A scam I thought, there's no way I'm paying that, but what to do I just couldn't figure out. Fortunately I know a brilliant IT man, not only is he brilliant he is quick and efficient too, he took my laptop for an hour or too and managed to unfreeze it, remove the trojan that had caused the seizure and install some software that would stop it happening again.

Unfortunately some of the work Andy had done caused other issues, my word documents and sreadsheets weren't opening properly, but with one quick phone call Andy was magically able to log onto my computer remotely and sort out the problem quickly.

So if you have a virus or trojan problem, Andy can fix it, and even if you haven't he can give you great advice on software that can prevent them.

I recommend him to the chapter and your contacts.
